**ISSUE:**

Amend an agreement with Cricket Communications, Inc. to use power from the Fitness Center to power antennas on the roof.

**SYNOPSIS:**

This resolution deals with an amendment to an Agreement with Cricket Communications to allow it to use power from the Fitness Center for its antennas, rather than installing its own power source. Cricket Communications will reimburse \$2,100 per year to the Fitness Center. Otherwise, Rocky Mountain Power would require closing the Fitness Center for a day to install separate power to Cricket.

**BACKGROUND:**

The City recently entered into an agreement with Cricket Communications to install wireless antennas on the roof of the Fitness Center. The project is complete, except for the installation of permanent power to the antenna equipment. Rocky Mountain Power no longer accommodates customer requests to work late at night, early mornings, or on weekends unless it is an emergency. The work would be scheduled during the day and leave the Centennial Park campus, including the Fitness Center, without power for most of a day.

An alternative is for Cricket Communications to use power already in the Fitness Center and reimburse the City for its use. The reimbursement will be equal or above the amount used each month. Significant down-time will be not be necessary, although some time will be required and it can be done at a time dictated by the City. Cricket will install a sub-meter so the City can monitor the use. All installation costs will be paid by Cricket Communications.

The accompanying resolution is to amend the original agreement and allow Cricket to use the power feed already in place at the Fitness Center.

**RECOMMENDATION:**

Approve amendment to the agreement.
